

Design a Rover

Bronze

Draw your design for a Mars rover. Remember to include detailed labels and descriptions of the different features your design includes and why they are important. You might want to include different views of your rover.

Side view of the rover:

Front view of the rover:

Some questions to think about:

- How many wheels will it have?
- What material will you use for the wheels?
- How will you ensure it doesn't tip over on the uneven ground?
- How will it take photographs of the surface?
- How will samples be collected for analysis?
